I . Chinese Proficiency Test (HSK)

1. Introduction of HSK

The new HSK test was launched by Hanban after in-depth surveys on Chinese language teaching in other countries conducted by experts from various disciplines such as Chinese language teaching, linguistics, psychology and educational measurement. Taking into consideration the differences between professional learners and non-professional learners as well as the differences between learners living in China and learners residing overseas, incorporating the advantages of the former HSK and making use of the latest findings in global language testing, the new HSK is an international standardized Chinese language ability test based on the Chinese Language Proficiency Scales for Speakers of Other Languages.

According to regulations by China's Ministry of Education, foreign students can enroll in degree-granting major courses in a Chinese university/college based on their HSK test results. The HSK test results can also serve as a reference tool for employers when making recruiting decisions.

2. HSK Levels and Test Structures

The new HSK is an international standardized exam that tests and rates Chinese language proficiency. It assesses non-native Chinese speaker's abilities in using the Chinese language in their daily, academic and professional lives. There are six levels of writing tests, namely the HSK (level I), HSK (level II), HSK (level III), HSK (level IV), HSK (level V), and HSK (level VI). There are three levels of speaking tests, namely the HSK Speaking Test (beginner level), HSK Speaking Test (intermediate level), and HSK Speaking Test (advanced level). During the speaking test, test takers' speeches will be recorded.
